

ISIS - Feature #1163

Create a public beta build of ISIS

2012-10-03 07:07 AM - Stuart Sides

Status:	Closed	
Priority:	Normal	
Assignee:	Steven Lambright	
Category:	Infrastructure	
Target version:	N/A	
Impact:		Software Version:
Description		
Create a public beta build of ISIS to be distributed regularly.		
One idea would be to release the previous Production build as the Public Beta. This would allow in-house testing for one week before it is released publicly.		
Must...Must...Must, make it clear this is a beta and should not be used for production work.		

History

#1 - 2013-03-05 03:10 PM - Stuart Sides

Approved by Laz for March 2013 ISIS Maint.

#2 - 2013-03-06 11:53 AM - Steven Lambright

Do you want me to do this before this public release - probably before mid next week?

Answer: no.

#3 - 2013-03-07 12:00 PM - Stuart Sides

Set it up at your convenience, but we will wait for the next public release cycle to push the button.

#4 - 2013-03-25 01:01 PM - Steven Lambright

The process of pushing out a beta should be mostly automated... the build/svn changes necessary are still manual. I'm going to fix any problems found in this process, under this ticket, when pushing out the next beta build (probably cassini rings).

#5 - 2013-04-10 09:22 AM - Steven Lambright

- Status changed from Assigned to Resolved

I've verified the scripts are all functioning for beta builds (short of fully pushing a new one).

#6 - 2014-05-29 04:00 PM - Stuart Sides

- Status changed from Resolved to Closed

The scripts responsible for doing this were tested by distributing a beta version to the OSIRIS-REx team. The scripts worked.
